\*We recommend measuring the cake pan yourself rather than relying on the size stated by the manufacturer. In the list of cake pan sizes, find a pan size that closely matches the one you wish to use. Multiply the original recipe ingredient quantities by the figure in the right column that corresponds to your chosen pan size. This will produce a cake of similar height to the original cake. If you would

like to make the cake taller than the original, multiply the ingredient quantities by a slightly larger number than suggested.

If the original recipe calls for two eggs and you wish to use a whole number of eggs for the new pan size, choose a yellow or pink option.

If the original recipe calls for three eggs and you wish to use a whole number of eggs for the new pan size, choose a yellow or blue option.

If the original recipe calls for four eggs and you wish to use a whole number of eggs for the new pan size, choose a yellow, pink or purple option.

If the original recipe calls for five eggs and you wish to use a whole number of eggs for the new pan size, choose a yellow or unshaded option.
